- 1. The deckestroy lachine Factory too alout 7 km north of Bramatersk (h80k3+1/27032+1), Ukrainian C.S.R., northeof the Stalin Slant. * Since 1945 F.Es of various nationalities and poviets had torked on the reconstruction of the slant blick hed been among during the var. The Since shipments of rackinery arrived during the fall of 1945 from Landsborg/Sarthe. Crimon specialists unpacked the boxes and installed the machines. Production storted during the virter of 1945/1946 with a few German specialists and one organisms.

 All other Pres were ditherson in the summer of 1946, then the construction work was completed, and PW camp No. 7242/1 in the garage was closed. The plant reduced type Waldrick No. 7 lathes. Inscriptions indicated that some lathes were shipped to Novosibirsk.
- all plant roofs were still designed or destroyed. Pollow P.'s said that roof the workshops were vacant. The clearing and reconstruction work was pashed ahead rapidly. Production began as ain in early 1946 and the construction of several new workshops was started at the same time. Two workshops with a steel framework were constructed in 1947 and 1948 as was an L-shaped building in the northern part of the plant yard. **
 - J. The three asombly shops, 200 x 50/ naters, were brick buildings with a stall fractwork. The roofs on thice shops were class supported by a stell fractwork. Various packings were standing along the long walls of the eastern assembly shop and a conveyor belt, about 1 meter high, carried semi-finished machine tools along the entire length of the northern wal. About 60 to 70 assembly workers worked at both sides of the conveyor belt a dit e verkehop had a total labor force of about 250. This eastern assembly shor produced screw cutting lathes. Three such lathes wereleaded on one railroad car for shipping.
 - 4. Raw materials and opi-finished products were supplied to the plant Dankoctroy by the large plant to the south. It was not determined whether this plant to the south actually produced the semi-finished products. Products of the Dankoctroy Flant core shipped via the clark to the
